Severe Threats This Afternoon-Eve

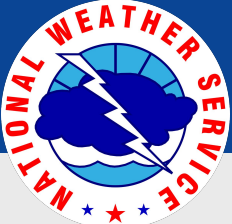

August 10, 2026
2:24 PM

Scattered severe storms possible late this afternoon into this evening

Overview:

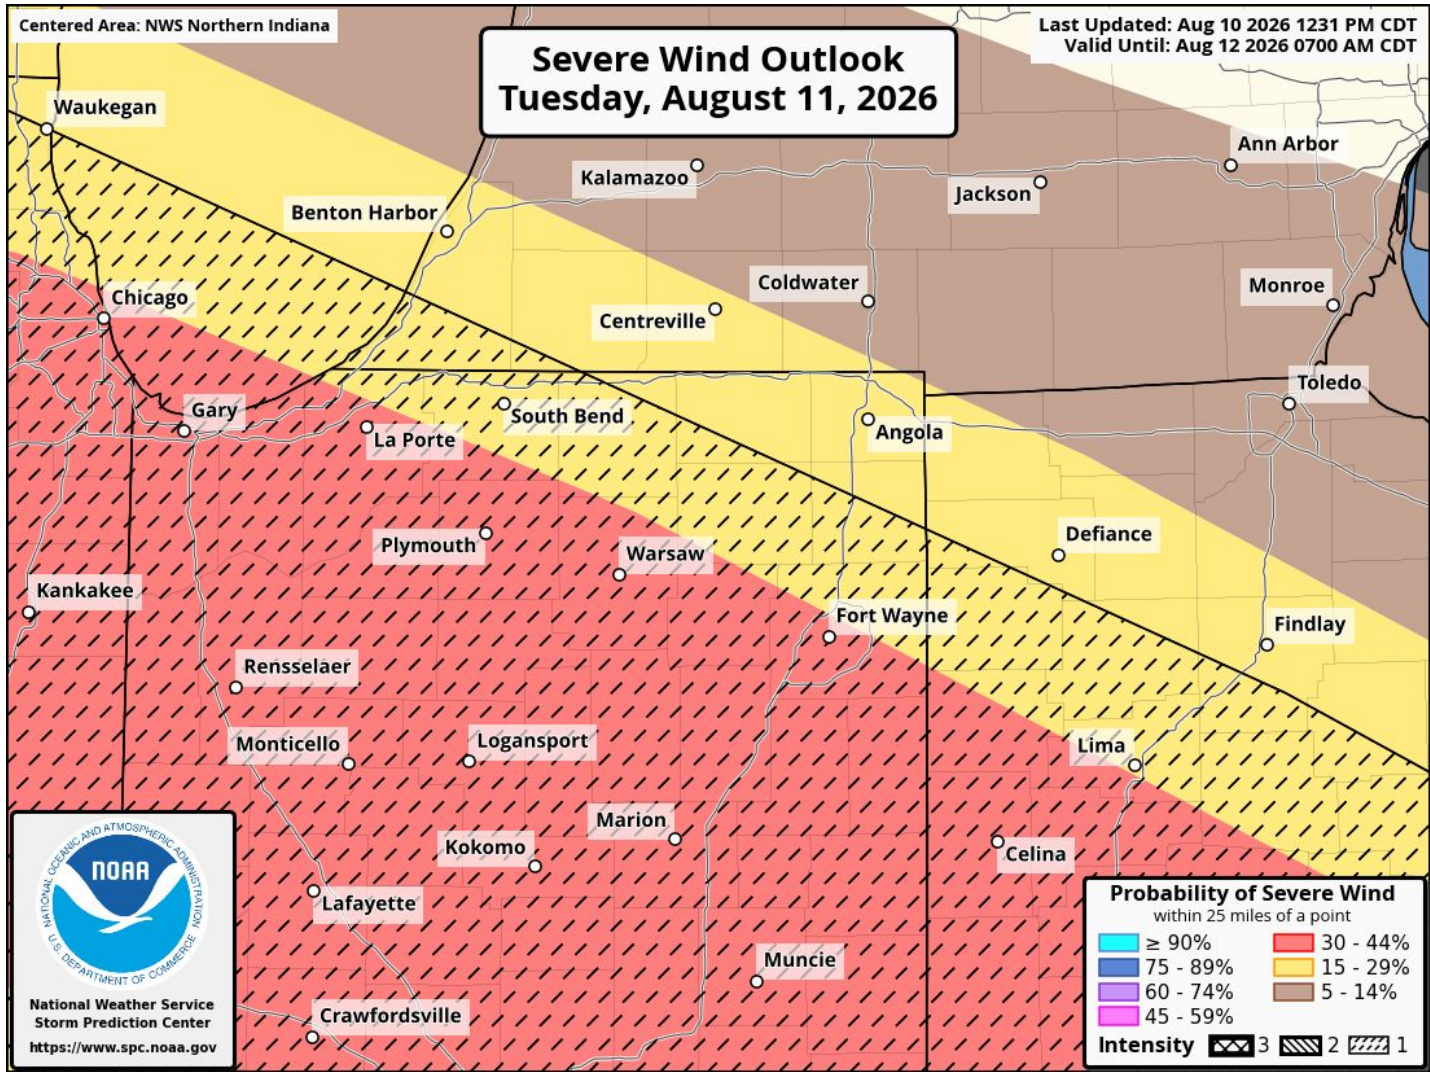

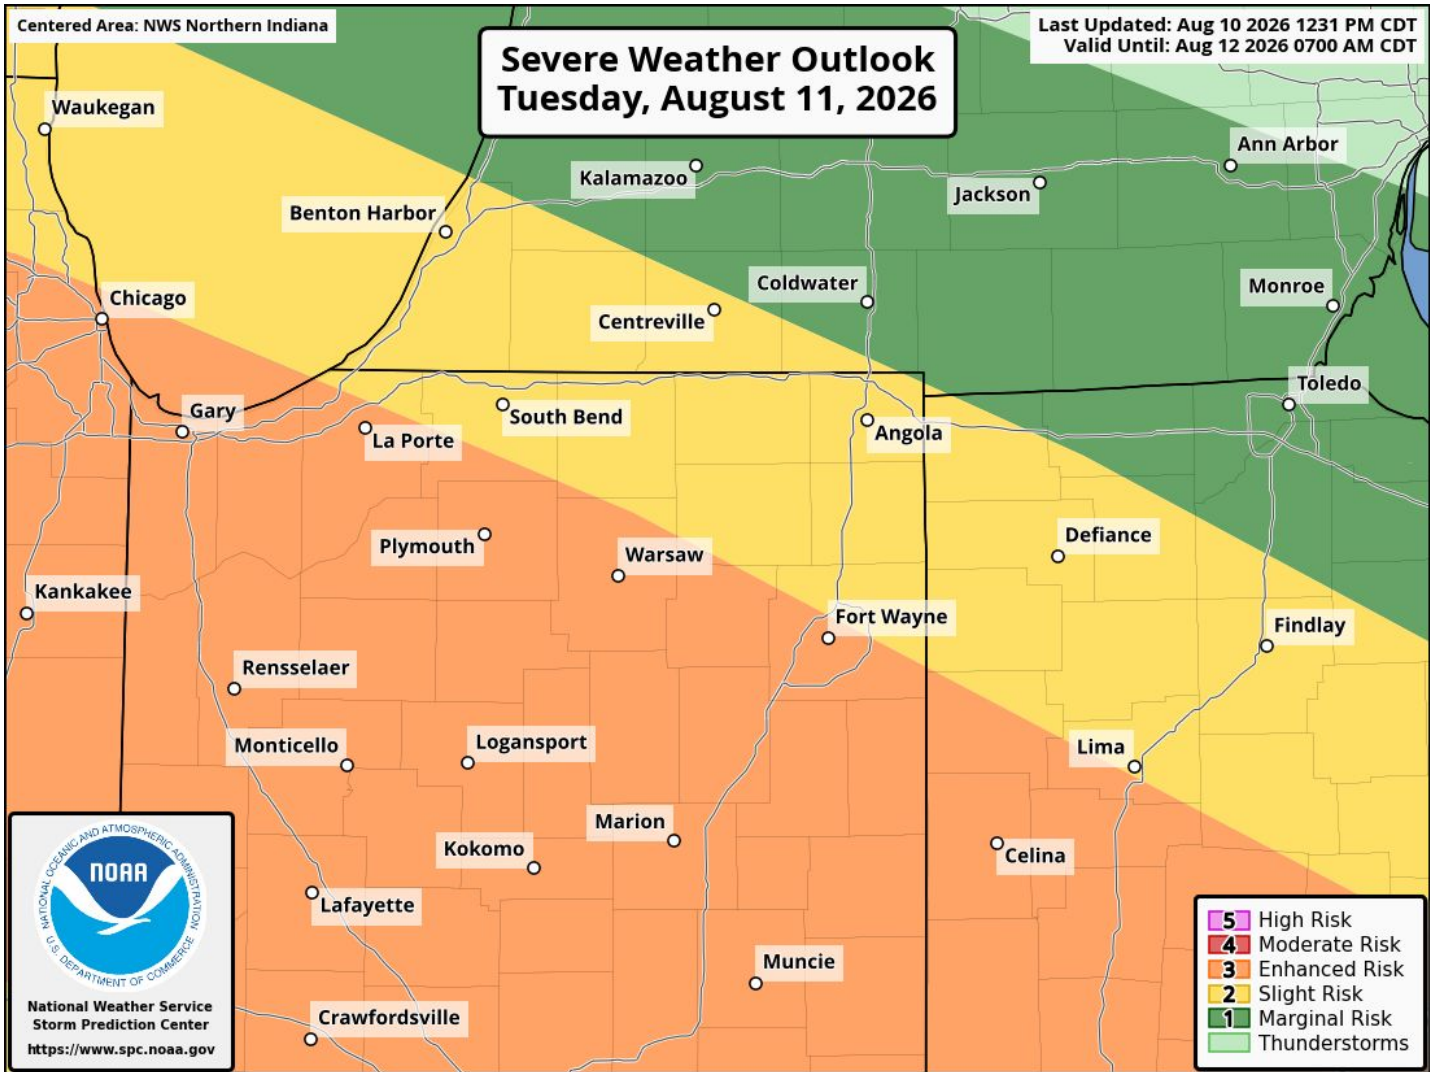

- ➔ Main severe threats will be damaging wind (15-29%) and Hail (5-14% all areas). There is a threat for isolated tornadoes (2-4%).
- ➔ There could be two rounds, late this afternoon and evening, and then another possible overnight.

Severe Weather Threat Tuesday

August 10, 2026
2:24 PM

For the Most Recent Outlooks, Visit www.spc.noaa.gov/products/outlook/

Timing: Afternoon/early evening hours (1p-7p greatest threat)

Hazards: Damaging winds as the primary threat with a potential of straight winds over 75 mph. Isolated large hail and isolated tornadoes are possible. Locally heavy rainfall may aggravate flooding for areas which have received heavy rain recently

Confidence: Medium

FLOODING

Sometimes difficult to see during the day.

AT NIGHT

Impossible to see at night.

weather.gov

ENHANCED RISK

Numerous severe storms possible.

Some longer lived severe storms -- a few intense storms possible.

Have multiple ways to get NWS warnings and seek shelter immediately when warnings are issued for your location.
