

Flood Watch for Today

September 17, 2026
3:24 AM

Flooding possible this morning

Key Messages

- Numerous showers and storms with locally heavy rainfall rates this morning.
- A Flood Watch is in effect through 2PM this afternoon for portions of the area (see map to the right) that received heavy rainfall last night, and are in line to see more thunderstorm activity this morning.
- While the highest concerns for flash flooding this morning will be in the Flood Watch area, heavy rainfall is likely across much of the area. Localized rainfall amounts of 1-3" likely.

NEW

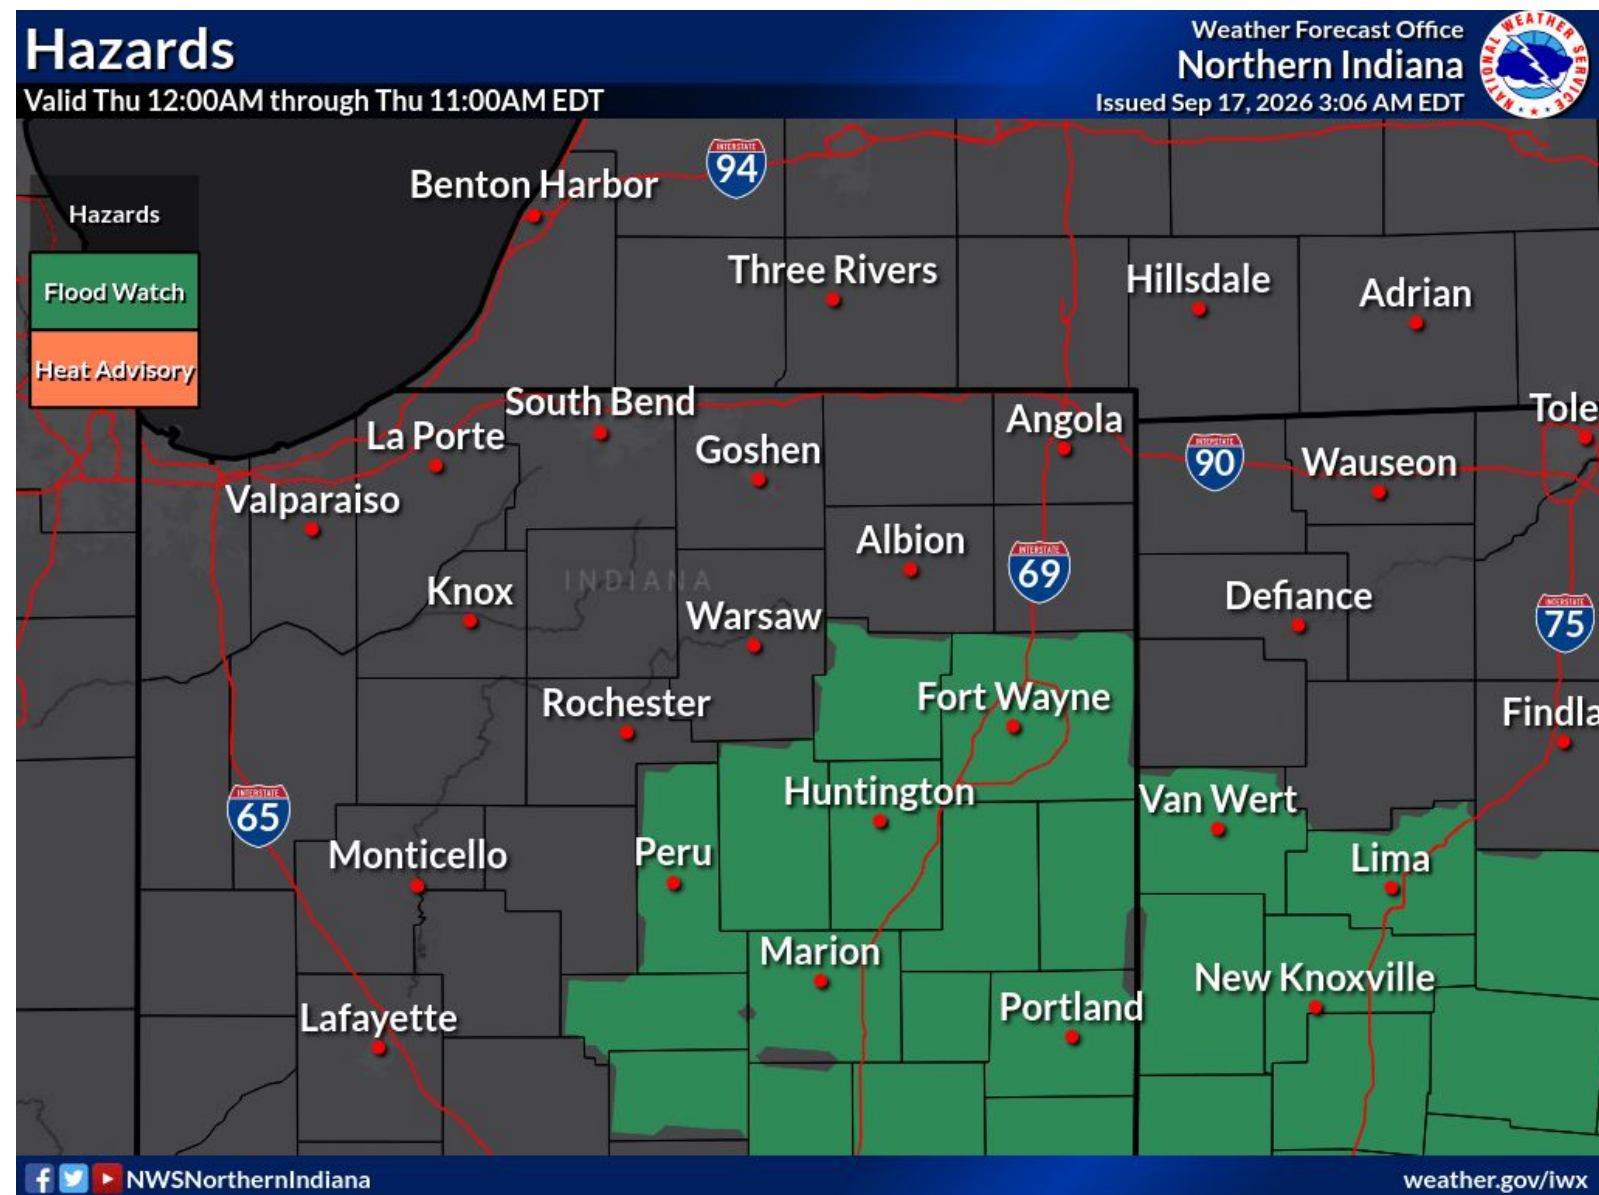

Important Updates

- A row of counties added to the northern fringe of the Flood Watch

Next Scheduled Briefing

- This is the final briefing for this event

Flood Watch

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Northern Indiana

Flash flooding can escalate quickly.

Heavy rain can lead to sudden flash floods, whether you're on the road or at a campground. Will you be ready?

Set up a way to get weather warnings on your phone

When alerted to a flash flood, get to higher ground immediately

Never enter floodwaters in a vehicle or on foot
